Green Deal Circular Festivals	Green Deal Circular Festivals model	<a href="https://www.circularfestivals.nl/mo-del/default.aspx">https://www.circularfestivals.nl/mo-del/default.aspx</a>	Circular festivals; Energy; Materials; Travel and transport; Water and sanitation; Food and drinks.	Any festival.	Guidelines.	Vadlīnijas pieejamas mājaslapā.
AGF	Greener arena certification	<a href="https://www.agreenerfuture.com/greener-arena-certification">https://www.agreenerfuture.com/greener-arena-certification</a>	Local environments; Local community; Travel and transport; Energy and power; Procurement; Food and beverage; Waste and recycling; Water usage; Wastewater and sewage; Governance and systems; External reach and behavioural change; Health and wellbeing; Equality, diversity and inclusion; Carbon footprint.	Arena.		Vadlīnijas nav pieejamas mājaslapā.
EcoCert	Sustainable wellbeing center	<a href="https://www.ecocert.com/en/certification-detail/sustainable-wellbeing-center">https://www.ecocert.com/en/certification-detail/sustainable-wellbeing-center</a>	<b>Environmental Management</b> (Water resource management; Energy resource management; Waste and discharges management); <b>Products that respect people and the environment</b> (Cosmetics, hair care and home fragrances; Textiles; Consumables; Detergent products; Laundry; Management of swimming pools and other pools; Snacks; Vegetation); <b>Social commitments</b> (Towards the staff; Towards customers; Towards producers).	Managers, owners and brands of spas, thermal baths and thalassotherapy centres, sports and fitness centres, hair salons and barber shops.		Vadlīnijas pieejamas mājaslapā.
EU Eco-Management and Audit Scheme (EMAS)		<a href="https://green-business.ec.europa.eu/emas_en">https://green-business.ec.europa.eu/emas_en</a>	<b>Energy efficiency; Material efficiency; Water; Waste; Land use with regard to biodiversity;</b>	Organisations operating in all economic spheres (including local authorities, NGOs, etc.), of any size, including multiple sites.	A voluntary environmental management scheme instrument designed by the European Commission.	
ISO	14001:2015 Environmental management systems — Requirements with guidance for use	<a href="https://www.iso.org/standard/60857.html">https://www.iso.org/standard/60857.html</a>	Provides a framework for organizations to design and implement an environmental management system, and continually improve their environmental performance. The framework encompasses various aspects, from resource usage and waste management to monitoring environmental performance and involving stakeholders in environmental commitments.			Maksas.
ISO	14040:2006 Environmental management — Life cycle assessment — Principles and framework	<a href="https://www.iso.org/standard/37456.html">https://www.iso.org/standard/37456.html</a>	Describes the principles and framework for life cycle assessment (LCA) including: definition of the goal and scope of the LCA, the life cycle inventory analysis (LCI) phase, the life cycle impact assessment (LCIA) phase, the life cycle interpretation phase, reporting and critical review of the LCA, limitations of the LCA, the relationship between the LCA phases, and conditions for use of value choices and optional elements. It does not describe the LCA technique in detail, nor does it specify methodologies for the individual phases of the LCA.			Maksas.
ISO	14044:2006 Environmental management — Life cycle assessment — Requirements and guidelines	<a href="https://www.iso.org/standard/38498.html">https://www.iso.org/standard/38498.html</a>	Specifies requirements and provides guidelines for life cycle assessment (LCA) including: definition of the goal and scope of the LCA, the life cycle inventory analysis (LCI) phase, the life cycle impact assessment (LCIA) phase, the life cycle interpretation phase, reporting and critical review of the LCA, limitations of the LCA, relationship between the LCA phases, and conditions for use of value choices and optional elements.			Maksas.

ISO	14046:2014 Environmental management — Water footprint — Principles, requirements and guidelines	<a href="https://www.iso.org/standard/43263.html">https://www.iso.org/standard/43263.html</a>	Specifies principles, requirements and guidelines related to water footprint assessment of products, processes and organizations based on life cycle assessment (LCA). Provides principles, requirements and guidelines for conducting and reporting a water footprint assessment as a stand-alone assessment, or as part of a more comprehensive environmental assessment.			Maksas.
ISO	20121:2024 Event sustainability management systems — Requirements with guidance for use	<a href="https://www.iso.org/standard/86389.html">https://www.iso.org/standard/86389.html</a>	A beacon for sustainable event management, guiding organizations to seamlessly integrate sustainability into every facet of their event planning and execution. With a keen eye on social, economic, and environmental impacts, this standard is pivotal for events that aspire to leave a lasting positive legacy.			Maksas.
ISO	20400:2017 Sustainable procurement — Guidance	<a href="https://www.iso.org/standard/63026.html">https://www.iso.org/standard/63026.html</a>	Provides guidance to organizations on integrating sustainability within procurement. It is intended for stakeholders involved in, or impacted by, procurement decisions and processes.			Maksas.
ISO	50001 Energy management	<a href="https://www.iso.org/iso-50001-energy-management.html">https://www.iso.org/iso-50001-energy-management.html</a>	Provides a framework of requirements for organizations to: Develop a policy for more efficient use of energy; Fix targets and objectives to meet the policy; Use data to better understand and make decisions about energy use; Measure the results; Review how well the policy works; Continually improve energy management.			Maksas.
ISO	59004:2024 Circular economy — Vocabulary, principles and guidance for implementation	<a href="https://www.iso.org/standard/80648.html">https://www.iso.org/standard/80648.html</a>	Includes defining key terms and concepts, outlining a vision for a circular economy, elucidating core principles, and offering practical guidance for actionable steps towards sustainability. The standard aims to support organizations in contributing to the United Nations Agenda 2030 for Sustainable Development by facilitating a transition to a circular use of resources.			Maksas.
ISO	59010:2024 Circular economy — Guidance on the transition of business models and value networks	<a href="https://www.iso.org/standard/80649.html">https://www.iso.org/standard/80649.html</a>	Focuses on business-oriented strategies to implement circular economy practices at both organizational and inter-organizational levels. It complements ISO 59004 by offering more detailed guidance on assessing current value creation models, mapping value chains and value networks, and developing strategies for circularity. ISO 59010 is designed to help organizations make this transition effectively, contributing to sustainable business practices and a resilient global economy.			Maksas.
ISO	59020:2024 Circular economy — Measuring and assessing circularity performance	<a href="https://www.iso.org/standard/80650.html">https://www.iso.org/standard/80650.html</a>	Sets forth requirements and guidance for organizations to measure and assess their circularity performance within defined economic systems. This document aims to standardize the process by which organizations collect and calculate data using mandatory and optional circularity indicators, ensuring consistent and verifiable results. It provides a structured framework for setting system boundaries, selecting appropriate indicators, and interpreting data to evaluate the circularity performance at multiple levels—from regional and inter-organizational to organizational and product-specific levels.			Maksas.
